
(a)
HD 284424
2021 Oct, conj. 1
2023 Sep, conj. 1
2023 Nov, conj. 2
2026 Jan, conj. 1
flux + offset
time from the predicted conjunction [d]
(b)
HD 284424: offsets from the Gaia prediction
Gaia prediction, 2σ
1σ
conjunction 1
conjunction 2
common drift
eclipse − prediction [d]
(c)
Wolf 1392
2021 Jul, conj. 1
2022 Jun, conj. 1
2022 Jul, conj. 2
2024 Jan, conj. 1
2024 Jul, conj. 1
2024 Nov, conj. 2
flux + offset
time from the predicted conjunction [d]
(d)
All systems
9 systems, 47 eclipses
first eclipse per conjunction: std 1.10
expected within the windows if exact: 0.87 ± 0.15
(eclipse − prediction) / σGaia
conjunction 1
conjunction 2
(e)
The other systems: one eclipse each
TYC 3908-665-1, 241.7 d, 14.31%
CD−81 705, 58.7 d, 6.19%
HD 170829, 26.4 d, 1.73%
HD 145453, 145.0 d, 0.69%
TOI-1656, 74.2 d, 0.63%
flux, scaled to each depth
hours from the eclipse minimum
(f)
Recovery of injected signals (windows with data)
WD
NS
BH
fraction recovered
eclipses
self-lensing flares
injected depth or height [%]
