Eclipses by Appointment: supplement guide

Current supplement guide, 5 November 2026.

The first four volumes retain dated per-object evidence. Their historical discovery counts and status labels are superseded by the current manuscript and reconciled registers. Volume 5 adds the 250-review evidence register; it records eight accepted additions and 41 confirmed/probable cases with catalogue novelty still pending.

1. Volume 1 original and early reviews (1187 pages)
2. Volume 2 comparison and bright stratum (762 pages)
3. Volume 3 bright followup and other evidence (504 pages)
4. Volume 4 screened completion and other evidence (820 pages)
5. Volume 5 period free review (82 pages)

Historical R-key volume/page map applies to the first four volumes. The new register links directly to full reports.
