Eclipses by Appointment: supplement guide

Current supplement guide, 5 November 2026.

The first four volumes retain dated per-object evidence; their historical status and discovery totals are superseded by the current registers. A documented typography-only repair in Volume 2 preserves all numeric tokens and page numbering. Volume 5 collects 380 mixed-method reviews and 138 faint-band reviews, with current inclusion flags.

1. supplement 1 original and early reviews (1187 pages)
2. supplement 2 comparison and bright stratum (762 pages)
3. supplement 3 bright followup and other evidence (504 pages)
4. supplement 4 screened completion and other evidence (820 pages)
5. supplement 5 period free review (158 pages)

Historical R-key volume/page map applies to Volumes 1–4. Volume 5 links to full reports. Current data: scientific register, mixed-method register, faint-band register. New selection and evidence; typography correction receipt.
